Course Numbering System

- A subject abbreviation precedes the course number; e.g., ENG 100, English Composition I.
- Only courses numbered 100 or above are applicable toward a degree.
- Number of credits and meeting hours for each course are listed after each course description.
- Any prerequisites listed must be completed before registering for a course. If the prerequisite is listed with a (*), it may be taken at the same time as the indicated course. Consult with your advisor if you believe you have met the prerequisite at another institution.
- Not all courses are offered each semester. Refer to Class Search (https://www.dccc.edu/class-search-redirect/?utm_source=dccc.edu&utm_medium=link&utm_campaign=MainMenu) on the DCCC website for current offerings.
- Special Studies courses are offered by specific academic areas. Topics will be announced for specific course requirements along with lecture and laboratory hours, credits and a brief course description.
